

Online Exam System

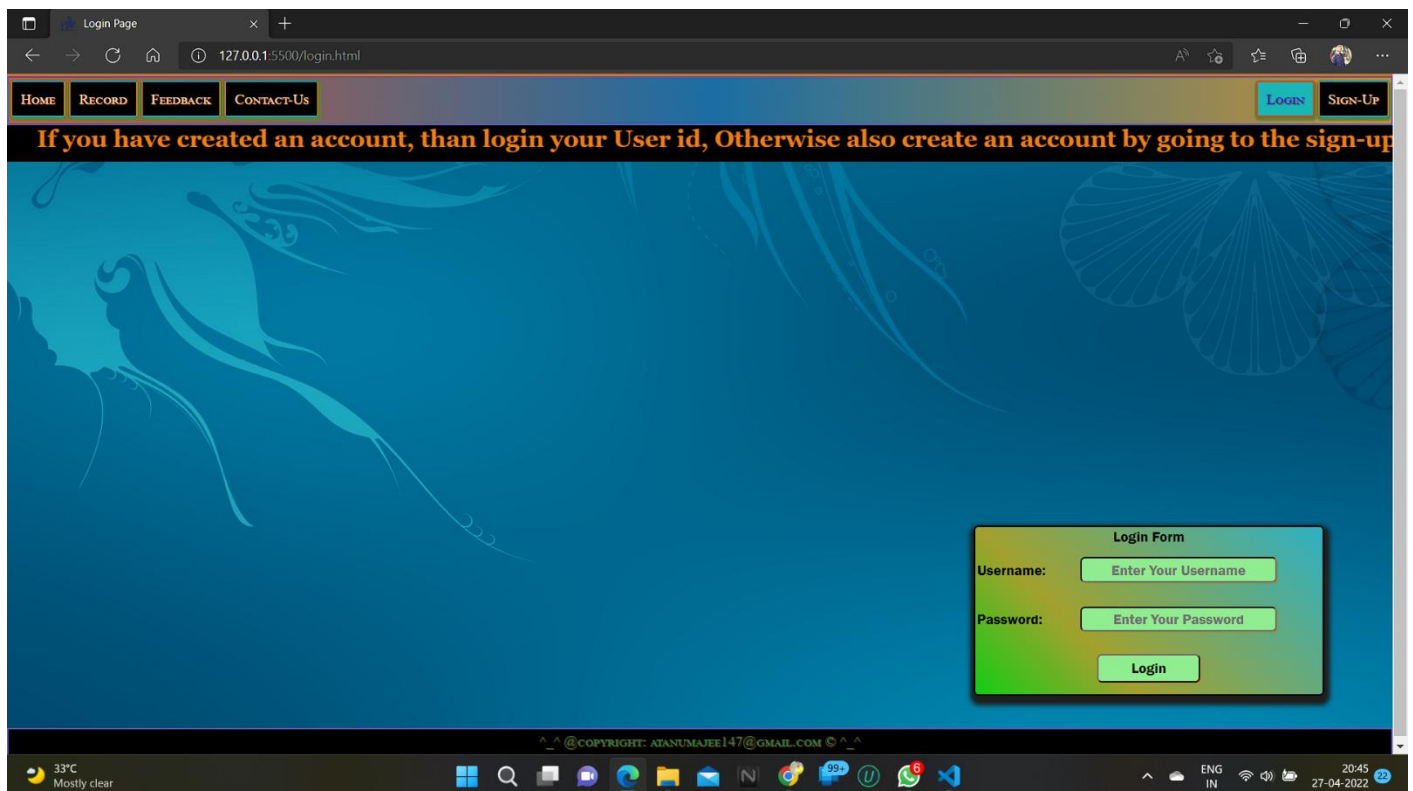

Using HTML, CSS, JavaScript (Local Storage, Date Function, onclick, onload Functions)

I have created a project using HTML, CSS, JavaScript where students can take exams. And that test will be seen during a time, the test will end according to that time. When the test is over, it will show how many marks he got.

Moreover, students can register themselves here and create their username and password, it will be stored in the local storage, login with it, login and take the test.

Candidates can find out through feedback how they felt about the test and that feedback can be stored on the Feedback Records page through local storage.

***Now we see how to work the login process:**

*Now we see how to work the Sign-up process:

Sign-Up page

127.0.0.1:5500/sign-up.html

HOME RECORD FEEDBACK CONTACT LOGIN SIGN-UP

If you have created an account, than login your User id, Otherwise also create an account by going to the sign-up

Registration Form

Name:

Email Id:

Username:

Password:

Re-type Password:

Date of Birth:

^_^ @COPYRIGHT: ATANUMAJEE147@GMAIL.COM ^_^

30°C Mostly clear

21:28 27-04-2022

*Now we see how to record sign-up data:

Record page

127.0.0.1:5500/record.html

RECORD CONTACT FEEDBACK CLEAR RECORDS TYPE A NAME AND SEARCH SEARCH LOGIN SIGN-UP

Student Data Record Table

Username	Name	Password	Re-Enter-Password	Email	Date of Birth	Action
sarbanilohar147	Sārbāñī Lohāř	713204	713204	sarbanilohar66@gmail.com	1999-02-03	<input type="button" value="Delete"/>
atanumajee147	Atanu Majee	723133	723133	atanumajee147@gmail.com	1999-02-01	<input type="button" value="Delete"/>
dolly123@gmail.com	Dolan Champa Biswes	1234	1234	sornali.biswas1996@gmail.com	1999-02-12	<input type="button" value="Delete"/>

30°C Mostly clear

21:35 27-04-2022

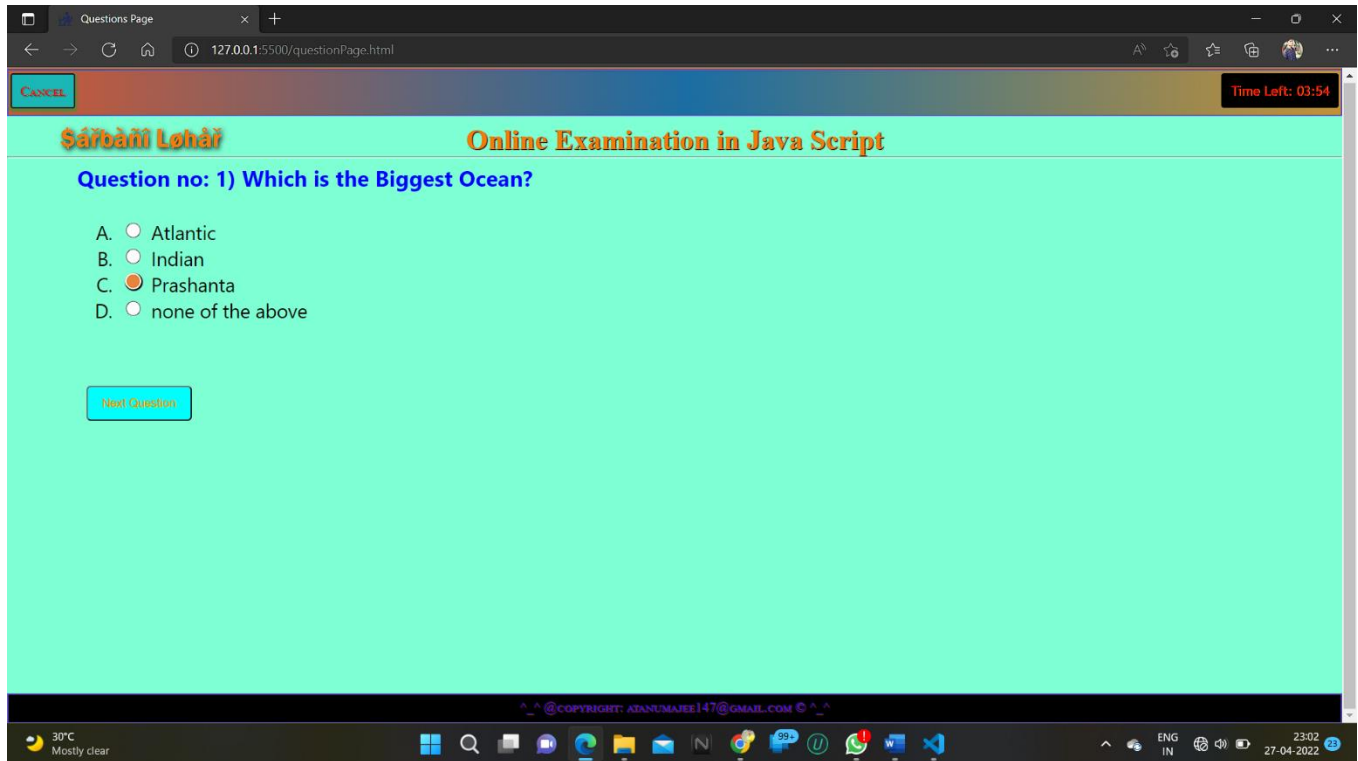

Note: This page will store all the data of the registration, I will use the clear records button to delete that data together, moreover I will use the delete button to delete the records one by one. We will use the search bar to find the data.

*Now we will see how we will give the test if our login is successful:

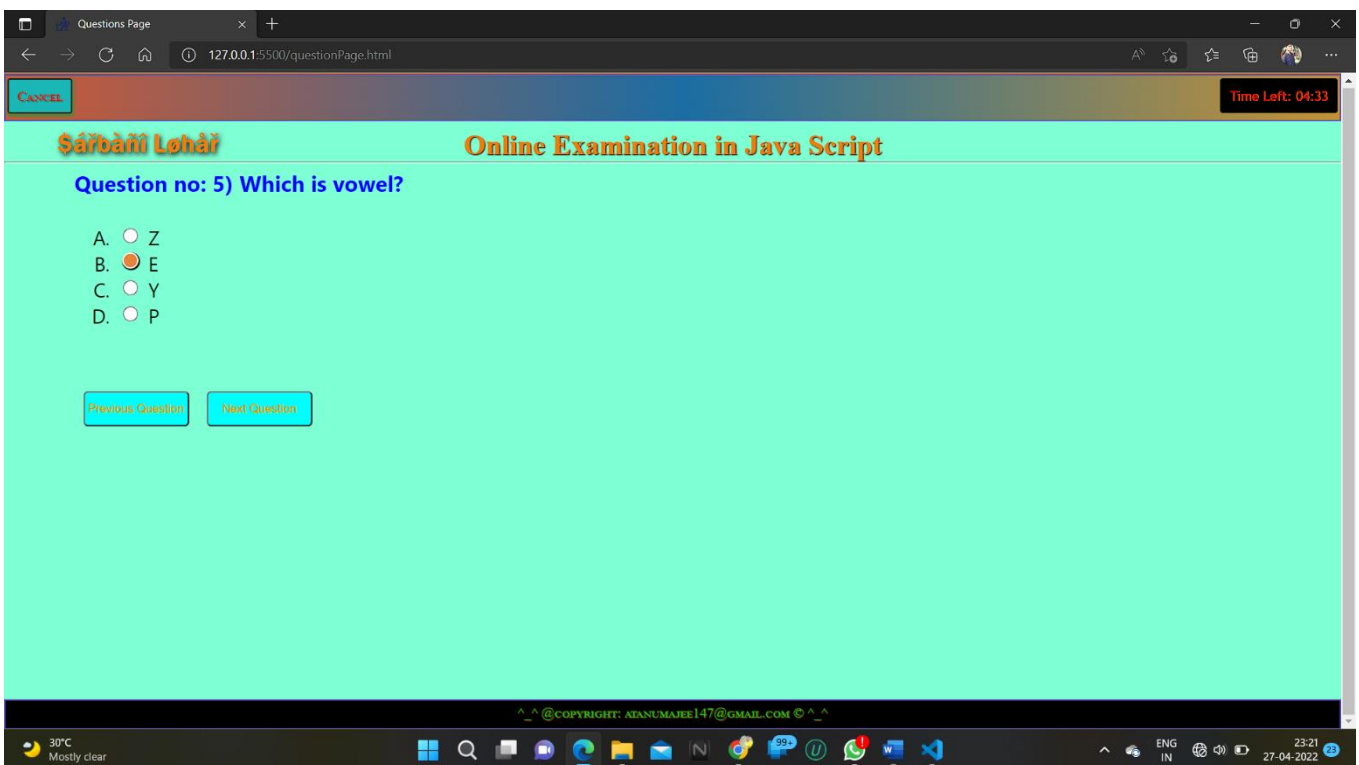

The name I see here is coming from local storage, he registered this name on the registration page.

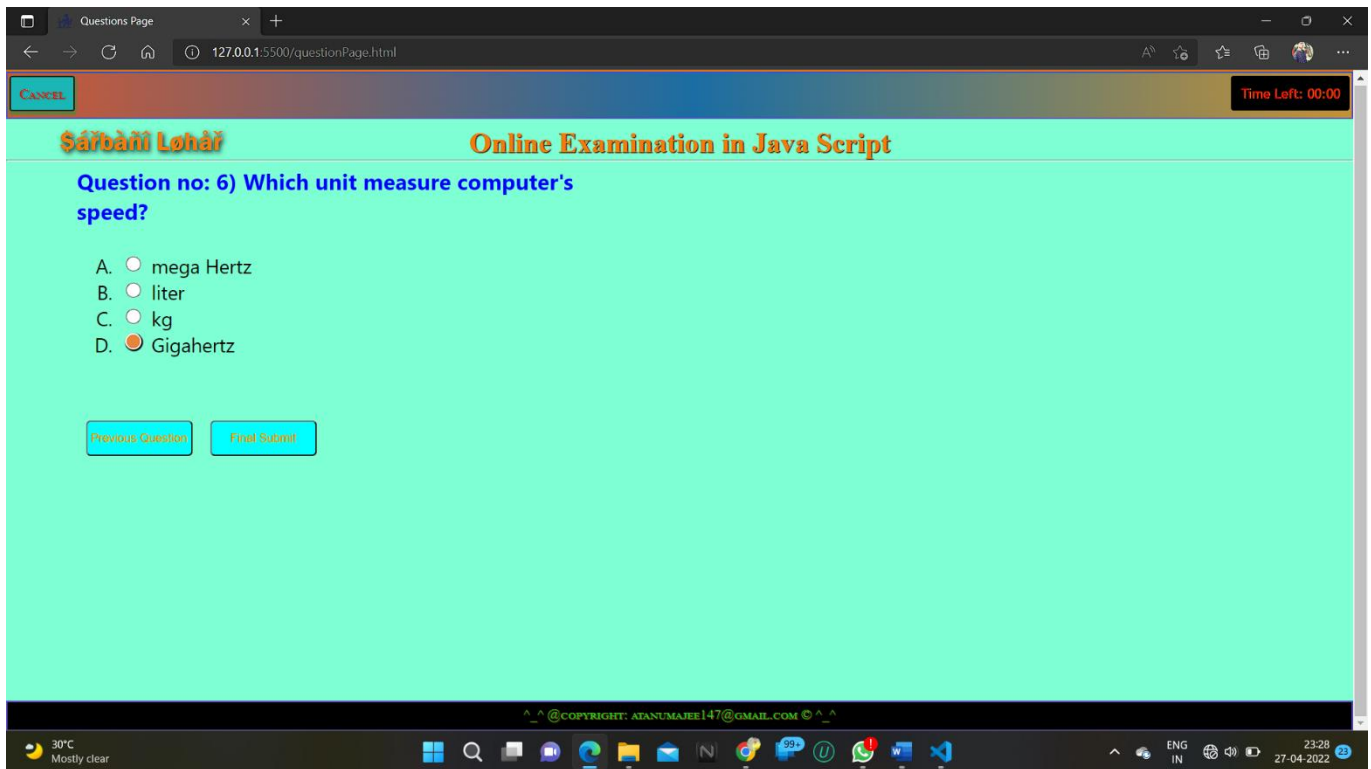

*Now we will see how the test works:

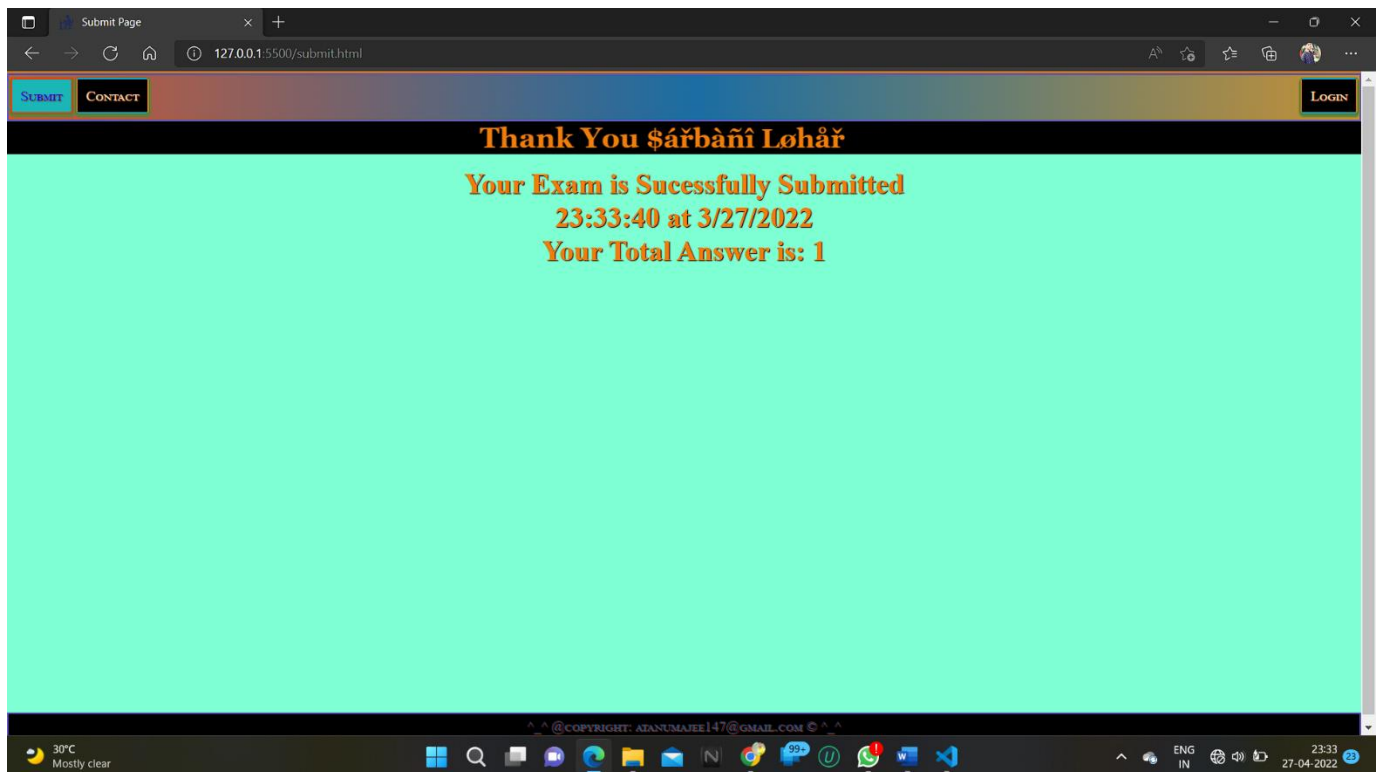

I saw the first page, this time I will see another page:

Now we saw the last page:

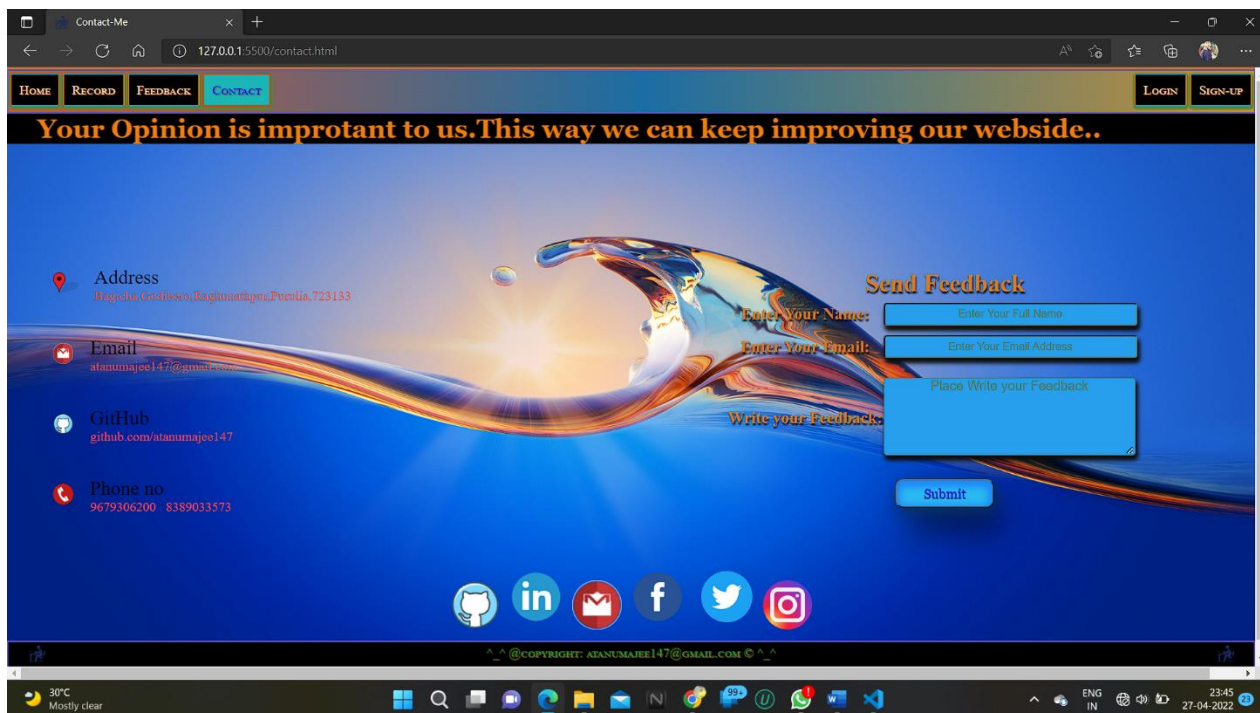

Now we see how the result can be seen after submitting:

Let's see how we can give feedback:

After clicking on the login button, come to the contact page and send feedback, then the feedback will be stored on the page through Local Storage.

See the Feedback Page:

This project creates only for practice HTML, CSS and JavaScript Language .

Using: vs code editor

Thanks for Watching this project
